AND CHILDREN THE BEST PERU-NA ARE THE WOTHERS

When Sickness Comes to the Little Ones.

It Is the Mother Who Chiefly Suffers.

She suffers even more than the child who happens to be sick. Her sympathy is deeper than that of any other member of the family.

The inothers look forward with dread to the torrid heat of summer, thinking of their children and the many labilities to disease that are before them. Spring and summer are sure to bring allments, especially among the little folks.

It does not take a mother very long to discover that Peruna is the best friend she has in times of filness among the children.

children.
The doctors may come and go with their different theories and constant change of remedies.
The doctor of years ago gave entirely different remedies than he does to-day. Each year finds some change in his prescriptions and in the drugs he relies upon. A Great Multitude of Mothers

A Great Multitude of Mothers
Have discovered that Peruna is the
stand-by, and that in all the allments of
spring and summer to which the children
are subjected. Peruna is the remedy that
will most quickly relieve.
Whether it is spring fever or stomach
derangement, whether it is indigestion or
bowel disease, a catarrhal congestion of
the mucous surfaces is the cause.
Peruna quickly relieves this condition
of the mucous membranes. Its operation is prompt, the children do not dislike to take the medicine, it has not deleterious effects in any part of the body.
It simply removes the cause of the disagreeable symptoms and restores the
health.

Peruna is not a physic. Peruna is not a nervine nor a narcotic. Peruna does not produce any drug habit, however long it may be taken. Peruna is not a stim-

Peruna is a specific remedy for all ca-tarrhal ailments of winter and summer acute or chronic.

The mothers all over the United States are the best friends that Peruna has.

The Mothers Hold Pe-ru-na in High

Not only because it has cured them of their various aliments, but because it always rescues the children from the throes and grasp of catarrial diseases. We have in our files bushels of testimonials from mothers whose children have been cured by Peruna. However, the large majority of mothers who use Peruna, we never hear from.

But we do hear from a great number of mothers who are so overloyed at some special good they have received from Peruna that they cannot festival their enthusiasm. They are anxious to share these benefits with other mothers.

The Benefit Which the Children of the United States Have Received From Peruna Can Never Be Put Into Words.

The chronic ailments it has prevented, the suffering it has mitigated, will never

be fully recorded.

But at least this much can be said tha the coming generation owes a great debt to Peruna, for it is in the tender years of youth that slight allments are liable to of youth that sight alments are nable to develop into lasting diseases, thus blasting the whole cureer of the individual. The mothers who are bringing up their children to-day to believe in Peruna are doing a great work for humanity.

These children brought up to believe in Peruna from the start, will, when they become heads of familles themselves use

Diseases.

As soon as the value of Peruna is appreciated by every household, both as a preventive and cure, tens of thousands of lives will be saved, and hundreds of thousands of chronic. Ingering cases of catarrh will be prevented. Peruna is a household safeguard.

Mrs. S. Miles, Stoughton, Wis., writes: "When my baby, Evelyn, was quite young I noticed that she had catarrh. This worried me so much that I took her to a doctor and he prescribed for her. She seemed to get better but the relief was only temporary, as I noticed that with the next cold she contracted she was worse.

"I had used Peruna myself some time before with such good results that I decided to give it to her, feeling sure that there was nothing in it that could injure her. I gave her two bottles, which was all that was necessary, for it cured her, I am glad I took hold of this trouble while she was young and before it had secured too strong a hold on her system. I keep it on hand now and give her a few doses whenever she takes a cold, and it always takes effect and keeps her well and strong,"—Mrs. S. Miles.

Mrs. Mary E. Connor, 724 Twenty-third Street, San Francisco, Cal., writes: "Peruna has been a blessing to my home. It has kept sickness out and we are to-day a happy and well family, thanks to Peruna. My husband was cared of lung trouble through Peruna and this showed us its merits.

GENERAL DAVIS NOW.

Brother of Dr. H. W. Davis, of This City, Receives Commission This City, Receives Commission
Dr. H. Wythe Davis, of this city, is in receipt of a letter from his brother, Col. Wirt Davis, announcing that the latter has just been commissioned Brigadier-General U. S. A., retired,
General Davis is a native of Richmond. Besides Dr. Davis, he has three other brothers—B. T., John R., and E. S. Davis, who live in West Virginia.
General Davis's promotion comes after four decades of active military service in this country, Cuba and the Philippines, and is a pleasing recognition of years of gallantry and of honorable wounds. He callsted in 1850 and continued to serve his country until placed on the retired list by limitation about a year ago.
The career of General Davis has been a most interesting one, and when one recalls the fact that he enlisted as a private, his promotion seems remarkable.

Many Requests to Repeat.

The cast in "Under the Laurels," the pretty drama that recently made such a hit at Corcoran Hall, are besieged by requests for repetition of the play for many worthy causes. They have consented to reproduce the play at Corcoran Hall on June 10th for the benefit of the Main street Station Young Men's Christian Association and Venable Street Eaptist Church.

They have among others invitations from the Young Men's Christian Association at Clifton Forge and from parties in Louisa to present the play at those places, and the indications are that at least these two invitations will be accepted. The cast met last night at the residence of Mrs. Bickers, the directress of the play, and a willingness was expressed to accept the Louisa and Clifton Forge invitations if salisfactory arrangement as to dates can be made.

Bright's Disease and Diabetes News.

Pacific Coast Biscuit Co., R. C. Pell, Manager, San Francisco, April 2, 1904. To parents of children having Bright's Disease: I feel impelled to write you my per-

sonal experience with this disease, the gravity of which I feel strongly through the death of my father some twenty years ago from that trouble and the serious illness of my son nearly two years ago, when he was pronounced by two physicians to have Bright's Disease in its worst form, with recovery impossible. His whole body was swollen with the dropsy, great difficulty in breathing, and death at any moment would not have sur-prised us. Medical science having been exhausted, we put him on the Fulton treatment for Bright's Disease. In six months his recovery was complete. Phy-sicians have five times since found him normal and without physical defect. Hearing that the son of a friend (an attorney) was dying of Bright's Disease, I told him, and at last reports the boy had recovered. Last year a Mr. Baruch, representing a New York firm doing business with us, shocked us by his appearance. He said it was Bright's Disease, and feared it was his last trip to California. I told him, too, of my boy's case. Eight months later he called again. I hardly knew him. He said he was nearly well. There are lives to be saved and it is my duty, as well as my pleasure, to lay these facts before you.
